

EAGLE CANYON FARM

RAW DAIRY HERD SHARES

We have creamy raw milk available from our cows on a weekly basis. Most of our cows are Jerseys, a breed well known for their rich milk and butter. We also have two Guernsey heifers freshening this spring and will have "Golden Guernsey Milk" available as well. Fresh unpasteurized, unhomogenized milk has many health benefits and is delicious.

All of the cows are certified A2/A2 Jerseys and Guernseys, and are milked by hand every morning, ensuring you the healthiest and best tasting milk available. If you aren't familiar with A2 genetics, we invite you to take the time to do some quick research on your own. For starters, cows with A2/A2 genetics produce milk that's easier for people, particularly those with sensitivity to dairy, to digest!

A milk share of the herd costs \$10/wk in boarding fees, which, in turn offers you a half gallon jar of extremely creamy, whole, unpasteurized milk. Larger shares are available for families.

I'm Jake, owner of the Eagle Canyon dairy herd. I'm planning on delivering milk to the 63rd St. Farm and having it available for CSA members at the weekly pickup all summer if there is enough interest. Limited shares are available so please contact me to reserve your space. I also offer milk pickup right from my farm in Lyons, year round.
